

HydroHawk is brought to you by the creator of the world's fastest Legionella test - Hydrosense Ltd.

HydroHawk has been developed by the team at Hydrosense Ltd because we are passionate about protecting the public from potentially deadly Legionella bacteria.

Many people are unaware of the Legionella risks in water outlets like taps, showers, swimming pools, fountains, hot tubs and even garden hoses.

Any water system can have Legionella and it can cause Legionnaires' disease if inhaled.

Who has used the Hydrosense tests before?

The Hydrosense technology is used all over the world by water management companies and end users who want to protect their customers, staff and themselves from this dangerous bacteria.

What makes our product unique?

The HydroHawk test, using Hydrosense technology is the fastest in the world - giving results in just 25 minutes.

Why we love what we do?

Legionella pneumophila bacteria is responsible for the majority of Legionnaires' disease. Giving people an easy-to-use tool to find *Legionella pneumophila* bacteria quickly means they can make fast decisions about how to remove the risk or remove themselves from the risk.
